TDS46M
Stainless Steel
Thermodynamic Steam Trap with Maintainable Seat

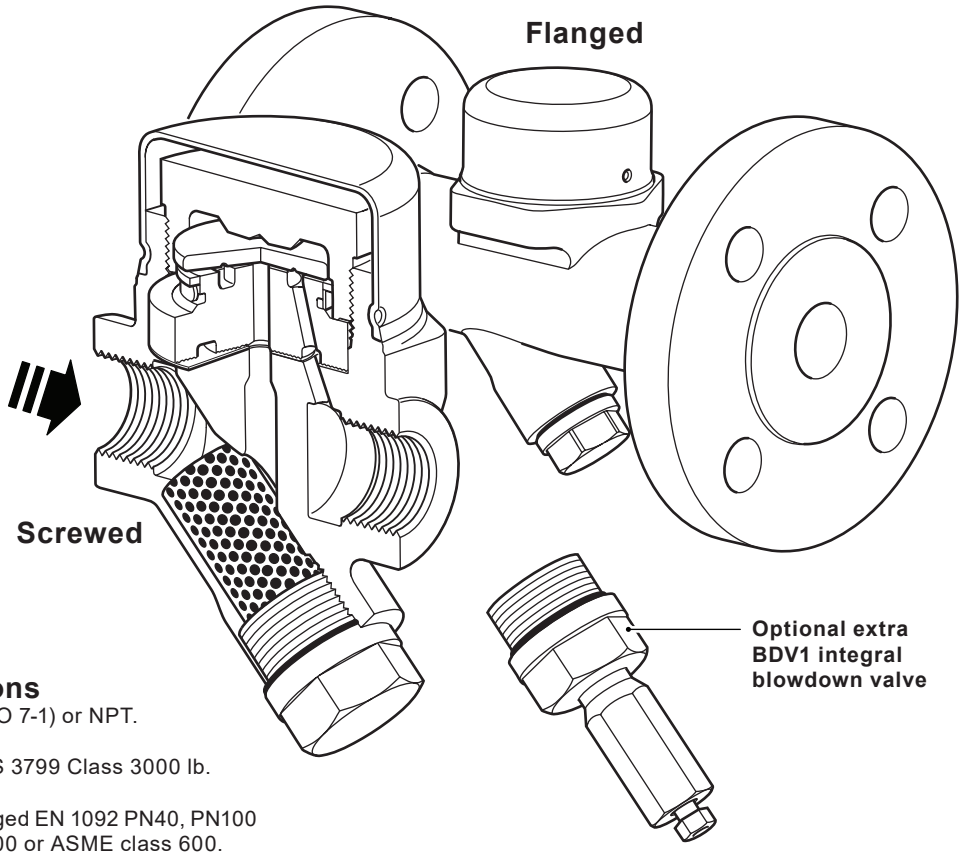
Description
The TDS46M is a stainless steel, thermodynamic steam trap that has been specifically designed for low capacity applications up to 46 bar g (667 psi g) (where pipe connections permit).
As standard the unit is available with either screwed, socket weld or flanged connections.

TDS46M benefits:
- Integral strainer.
- Integral air vent.
- Insulation cap.
- Replaceable seat.

Optional extras
At extra cost a **BDV1** integral blowdown valve can be pre-fitted to the strainer cap, please specify at the time of order placement.

Standards
This product fully complies with the requirements of the European Pressure Equipment Directive 2014/68/EU.

Certification
These products are available with certification to EN 10204 3.1.
Note: All certification/inspection requirements must be specified at the time of order placement.



Sizes and pipe connections
½", ¾" and 1" screwed BSP T Rp (ISO 7-1) or NPT.

½", ¾" and 1" socket weld ends to BS 3799 Class 3000 lb.

DN15, DN20 and DN25 integrally flanged EN 1092 PN40, PN100 and ASME class 150, ASME class 300 or ASME class 600.

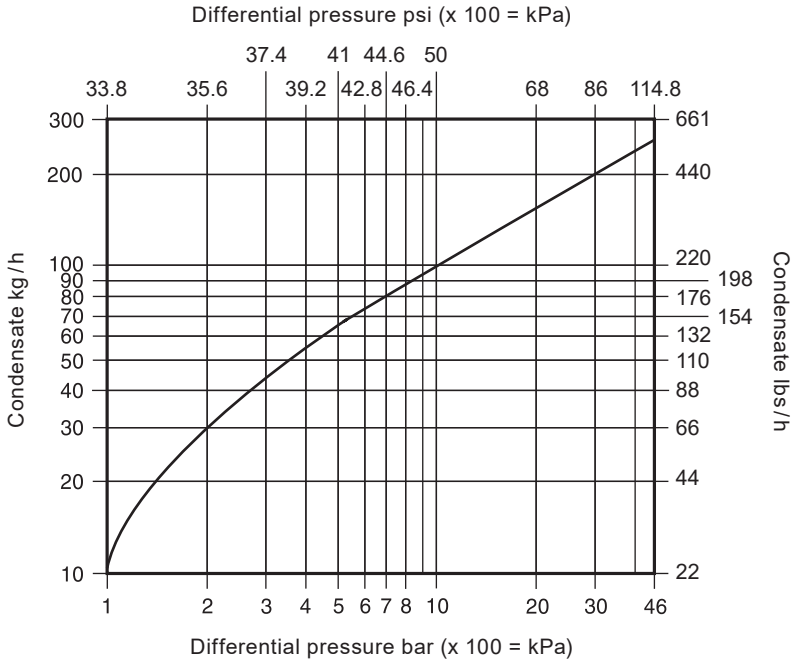
Capacities



Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P187-05) supplied with the product.

Installation note:

The TDS46M is designed for installation with the disc in a horizontal plane with the insulating cover at the top.

It is recommended that a non-return valve is fitted when discharging condensate into return lines where backpressure is experienced. It is also recommended that a diffuser is fitted when discharging to atmosphere.

For ease and maintenance, consideration should be given to fitting isolation valves upstream and downstream of the steam trap.

How to order

Example: 1 off Spirax Sarco DN15 TDS46M thermodynamic steam trap having flanged EN 1092 PN40 connections.

Spare parts

Please note that the spares shown are the same for the screwed, socket weld and flanged versions.
The spare parts available are shown in solid outline.
Parts drawn in a grey line are not supplied as spares.

Available spares

Insulating cover	**3**
Top cap, seat and disc assembly	**2**, **4**, **5**, **6**, **7**, **8**
Strainer screen and gasket	**9**, **10**
Set of gaskets (packet of 3 sets)	**8**, **10**
BDV1 blowdown valve retrofit kit	

How to order spares

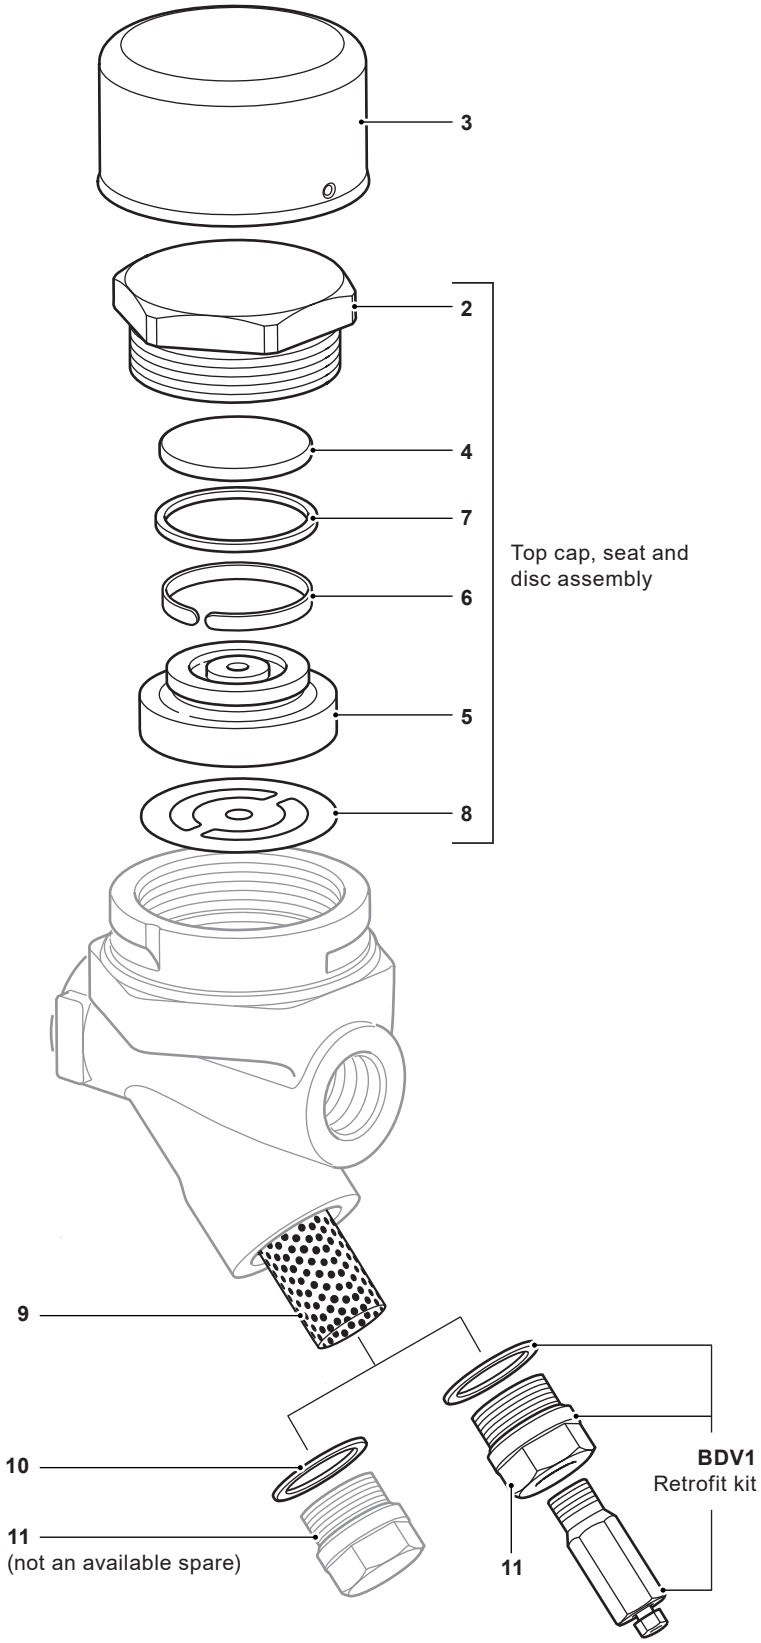
Always order spares by using the description given in the column headed 'Available spares' and state the size and type of trap.

Example: 1 off Top cap, seat and disc assembly for a Spirax Sarco DN15 TDS46M thermodynamic steam trap.

Cautionary note regarding disassembly and assembly of the unit:

Removal of the following parts:

- top cap (2),
- strainer cap (11) and the
- optional BDV2 retrofit kit should be carried out in a workshop, not whilst the trap is connected to the pipeline (PC) connector.



Recommended tightening torques (for suitably lubricated threads)
