

AeroSoniX

Exclusively for drones –

High temperature UT couplant that pumps like a fluid, stays in place like a gel.

Broad temperature range -50°F to 775°F (-45°C to 412°C)

Auto-ignition Temperature: 820°F / 437°C

Fast wetting due to low surface tension– no wait time

Optimal viscosity

Low evaporation rate

**No residue, varnish or corrosion
in drone pumps**

**Non-corrosive, and is not reactive
to metals or plastics**

No pump reservoir cleaning required

Air bubble-free

Non-toxic, environmentally benign

Packaged in 12-oz/355 ml bottles, quart/liter, and 1 gallon/3.8 liter containers.
